FEATURED PRODUCTS

Berger Elegance

Odourless | Anti-Bacterial | Easy Clean

Berger Elegance is an odour free, interior emulsion paint specially designed to provide a long lasting, smooth and attractive finish. It has the ability to neutralize formaldehyde and improve indoor air quality. It is fortified with anti-bacterial properties and has excellent coverage, which means you can paint more walls with the same quantity of paint. Its excellent stain resistance and washability makes your walls kid friendly. Berger Elegance has very low VOC and complies with Singapore Green Label Scheme.

DESIGN USE

As an anti-bacterial finish coat for concrete walls, gypsum board or plastered surfaces where a low sheen, long lasting, easy to clean finish is desired.

Weathercoat Silicone

Water Repellent | Washable | Fungus & Algae Resistant

Buildings, over the time will suffer physical and structural damages caused by water penetrating into the structure. The solution is a high performance coating with robust water repellence coupled with the ability to allow water vapour and Carbon Dioxide (CO₂) to permeate.

Weathercoat Silicon is a self-cleaning, external wall paint with excellent water vapour permeability. Based on acrylic silicone resin, it offers a hydrophobic coating which repels water and is highly resistant to soiling and aggressive weather conditions.

DESIGN USE

As a finish coat for new exterior masonry substrates where a higher level of performance is required.

Weathercoat Maxcool

Solar Reflective | Anti-Algal | Anti-Carbonation

The average temperature of Singapore is considered a heat wave in many other countries. For most of us, the only way to get respite from the heat is by use of Air Conditioners. This leads to higher electricity consumption and inefficient energy usage. Berger presents a revolutionary solution with Weathercoat Maxcool.

In one package you have everything that is great about Weathercoat 345 along with unbeatable Thermal Efficiency and Solar Reflectance. The CoolPro technology cools buildings dramatically by using Infra-Red (IR) reflecting inorganic pigments with best in class Solar Reflectance Index (SRI) giving cooler surfaces and huge energy savings.

DESIGN USE

As a low VOC solar reflective finish paint for exterior masonry substrates where performance up to 5 years is required.

EXTERIOR PAINT

WEATHERCOAT MAXCOOL

Finish

- Low Sheen

Features

- CoolPro Heat Reflective
- Excellent dirt pick-up resistance
- Highly washable with low VOC
- Prevents discolouration and chalking
- Anti-Carbonation

Coverage

- 11.5 m² / litre per coat @ 40 Microns

Certification

- Singapore Green Label

WEATHERFLEX 500

Finish

- Matt

Features

- Water Vapour Permeable
- Excellent crack bridging ability with elongation in excess of 200%
- Advanced Anti-Algal Formula
- Anti-Carbonation
- Fungus and Algae resistant

Coverage

- 3.2 m² / litre per coat @ 150 Microns

Certification

- Singapore Green Label

WEATHERCOAT SILICONE

Finish

- Low Sheen

Features

- Excellent water repellent properties
- Outstanding dirt pick-up resistance
- Highly washable and good resistance to alkalis
- Fungus and algae resistant

Coverage

- 15.6 m² / litre per coat @ 25 Microns

WEATHERCOAT 345

Finish

- Low Sheen

Features

- Anti-Carbonation
- Advanced Anti-Algal Formula
- Excellent washability and good resistance to alkalis
- Excellent dirt pick-up resistance

Coverage

- 15.2 m² / litre per coat @ 25 Microns

Certification

- Singapore Green Label
- PLS Approved - SS345

INTERIOR PAINT

BERGER ELEGANCE

Finish

- Low Sheen

Features

- Improves Indoor Air Quality
- Virtually no Paint Odour
- Superior durability and washability
- Near Zero VOC
- Fungus and Algae resistant
- Anti-Bacterial Formulation

Coverage

- 14 m² / litre per coat @ 30 Microns

Certification

- Singapore Green Label

BERGER EMULSION 150

Finish

- Matt

Features

- Highly washable
- Prevents discolouration and chalking
- Fungus and Algae resistant
- Excellent dirt pick-up resistance

Coverage

- 15.6 m² / litre per coat @ 25 Microns

Certification

- PLS Approved - SS150 Type I

BERGER WALLCARE

Finish

- Matt

Features

- Excellent washability
- Excellent coverage and hiding
- Covers hairline cracks
- Anti-Fungal and Anti-Algae
- Low Paint Odour

Coverage

- 15.2 m² / litre per coat @ 25 Microns

Certification

- Singapore Green Label
- PLS Approved - SS150 Type II

WOOD / METAL

BERGER GLOSS 7

Finish

- Gloss, Semi-gloss & Matt

Features

- Lead and Chrome free
- Excellent adhesion to ferrous surfaces, wood and aged coatings
- High opacity / covering ability
- Washable
- Excellent Flow and Levelling

Coverage

- 20.0 m² / litre per coat @ 25 Microns

Certification

- PLS Approved - SS7

WATER BASED ENAMEL

Finish

- Semi-gloss

Features

- Excellent gloss and durability
- Excellent adhesion on Ferrous & non-ferrous surfaces, wood and aged coatings.
- Higher opacity and covering capacity
- Free from Lead and other heavy metals
- Low VOC

Coverage

- 15.6 m² / litre per coat @ 25 Microns
